BUTTON TEMPLATE

Design your own

Step 1: Design your button

Buttons are the perfect way to show your passions and add flair.

1.
Print the template onto card-stock. A thicker paper or thin cardboard that is sturdy is another option.

3.
Create any design with paper elements and glue into place.

2.
Cut out your button background.

4.
Finish your design with any and colors you wish to add.

Step 2: Finish your button

Attach a safety pin for easy wear. Consider sealing your button for extra durability.

1.
On the back of your button, put a dab of hot glue.

2.
Attach a safety pin in the hot glue. Be sure to place the safety pin correctly so that the pin can open.

3.
You may wish to seal your button with Mod Podge or a similar sealant to make your button more durable.

4.
Gently brush a thin layer of Mod Podge over the top of your button. Repeat on the back side for extra protection.

5.
Let your button dry completely.

6.
Repeat the process to make buttons for all your friends and family.
