TITLE: Steve McCutcheon Collection

COLLECTION NUMBER: B1990.014

OVERVIEW OF THE COLLECTION

Dates: circa 1890-1990

Extent: approximately 180 linear feet

Language and Scripts: The collection is in English.

Name of creator(s): Steve McCutcheon, P.S. Hunt, Sydney Laurence, Lomen Brothers, Don C. Knudsen, Dolores Roguszka, Phyllis Mithassel, Alyeska Pipeline Services Co., Frank Flavin, Jim Cacia, Randy Smith, Don Horter

Administrative/Biographical History:

Stephen Douglas McCutcheon was born in the small town of Cordova, AK, in 1911, just three years after the first city lots were sold at auction. In 1915, the family relocated to Anchorage, which was then just a tent city thrown up to house workers on the Alaska Railroad. McCutcheon began taking photographs as a young boy, but it wasn't until he found himself in the small town of Curry, AK, working as a night roundhouse foreman for the railroad that he set out to teach himself the art and science of photography. As a Deputy U.S. Marshall in Valdez in 1940-1941, McCutcheon honed his skills as an evidential photographer; as assistant commissioner in the state's new Dept. of Labor, McCutcheon documented the cannery industry in Unalaska. From 1942 to 1944, he worked as district manager for the federal Office of Price Administration in Fairbanks, taking photographs of trading stations, communities and residents of northern Alaska; he sent an album of these photos to Washington, D.C., "to show them," he said, "that things that applied in the South 48 didn't necessarily apply to Alaska."¹

¹ Emanuel, Richard P. *Steve McCutcheon's Alaska, Alaska geographic*, v. 25, no. 1, p. 35

McCutcheon was drafted into the Army in July 1944 and received an assignment as a combat photographer for the 14th Signal Service Company. His military service was short: in January 1946, he was elected to fill the territorial Senate seat vacated by the death of his father, Herbert. That same year, he started his first business, Mac's Foto, developing film, producing prints, and selling photography supplies. Soon, he branched out into commercial photography. Obtaining a private pilot's license in 1949, McCutcheon took annual aerial shots of Anchorage; a hunting guide license allowed him to work with hunters shooting films of backcountry expeditions. His stock photographs of the local flora and fauna, geological features, glaciers, and other natural features, as well as Alaska Native culture, earned him an international reputation..

McCutcheon retired from electoral politics in 1953, but was elected one of seven delegates-at-large to the Alaska Constitutional Convention in 1955. While chairing the committee on the legislature, he compiled what remains the most complete photographic record of the Convention in existence.

The Good Friday Earthquake of 1964 destroyed McCutcheon's photo shop but provided a boon in jobs to document damage for insurance purposes. Between customer contracts and his own desire to capture the event, he created a huge catalog of images of the destruction. He and printer Steve Hafling partnered on a small book, *Alaskan Earthquake Pictorial*, which sold 20,000 copies.

In 1970, McCutcheon was again at the center of history in the making, when he became the first official photographer for the Alyeska Pipeline Service Company, builders of the Trans-Alaska Pipeline System. Over the course of seven years he took more than 30,000 photographs, capturing the lives of pipeline workers as well as the technical aspects of this major engineering achievement.

Throughout his multifaceted career, McCutcheon "used his camera to record the history he was helping to make."² He captured the history of Alaska during a time when few gave any thought to the epic transformations going on around them. In the process, he documented lives lived on a rugged frontier, a meeting of cultures, the building of a civilization, the triumphant development of natural resources, and the changing landscape of a northern region impacted by climate change. In McCutcheon's photographs are lessons for any who would study the history of America's pioneering spirit, the traditions and accommodations of Alaska Native peoples, the history of technology in extreme climates, the dominance of oil in modern society, or the effects of climate on man and nature.

Scope and Content Description:

² Emanuel, p. 47

There are approximately 125 glass lantern slides, 11 glass plate negatives, 4200 prints, 95,000 negatives, and 92,500 slides. The negative and slide images comprise the bulk of McCutcheon's commercial work and stock library, and focus particularly on the oil, fishing, and timber industries; Alaska politics and statehood; construction; earth sciences; the 1964 Alaska Earthquake; and Anchorage and other Alaskan communities. There are also numerous non-Alaskan images from around the United States and various international locations. Materials in Series 1-2 and 6-7 are images collected by McCutcheon during the course of his career.

Arrangement:

The collection is arranged in seven series: 1. Prints collected by McCutcheon. 2. Glass plate negatives. 3. Trans-Alaska Pipeline System (TAPS) prints. 4. Transparencies. 5. Film negatives. 6. P.S. Hunt glass lantern slides. 7. Panoramas.

See below for further subdivisions within series.

CONDITIONS GOVERNING ACCESS AND USE

Restrictions on Access: The bulk of the collection is open for research use. Images used in litigation are restricted.

Physical Access: Different series have different physical access requirements. Access to glass materials is limited. Some negatives have been moved to the freezer.

Technical Access: No special equipment is needed to access the materials.

Conditions Governing Reproduction and Use:

The Anchorage Museum is the owner of the materials and makes available reproductions for research, publication, and other uses. Written permission must be obtained from the Anchorage Museum before any reproduction use. The Anchorage Museum does not necessarily hold copyright to all of the materials in the collections. In some cases, permission for use may require seeking additional authorization from the copyright owners. Images in Series 3 (TAPS) are works-for-hire under copyright to Alyeska Pipeline Services Co.

ADMINISTRATIVE INFORMATION

Acquisition and Appraisal Information:

The McCutcheon collection was donated to the Anchorage Museum over the period 1990-1999. During his lifetime, McCutcheon organized and described his materials before transferring them to the Museum. His arrangement has been maintained within the negative and slide series. Initial processing of the collection focused on the photographic prints, which

were most accessible for patron use. Guides to the subject subdivisions within the negative and slide series were developed by Museum staff for in-house patron use.

Processing Notes

Over 700 images from the Trans-Alaska Pipeline System series were digitized and loaded into the Alaska Digital Archives in 2007.

In 2009, the Bob and Evangeline Atwood Alaska Resource Center (ARC) was awarded a grant of \$50,000 from the Alaska Community Foundation's Anchorage Statehood Celebration Fund to process and scan 35,000 negatives contained in the McCutcheon Collection over a two-year period. In 2010, the ARC received a digital collection cataloging grant in the amount of \$18,840 from the Interlibrary Cooperation Grant program administered by the Alaska State Library, to be used for metadata capture for 10,000 images. As of May 10, 2011, 13,864 negatives have been scanned and 7537 metadata records have been created in the Museum's integrated database system, The Museum System (TMS).

In 2015, staff began reorganizing Series 4 from original slide drawers into subseries that mirror the subseries in Series 5. Work temporarily ceased in 2018.

Separated Materials

Panoramas and glass materials filed separately. Some negatives removed to freezer.

Note

Processing of this collection is ongoing. This guide is not intended as a complete description of the collection.

Caro & Co., Inc., Juneau, Alaska [Color photomechanical postcard. Two men and a young girl looking over the results of a hunt for mountain goats. Case possibly on right, holding rifle]

- .1.83 – Mendenhall’s Glacier, near Juneau, Alaska [on verso:] Mendenhall Glacier, situated about fifteen miles north of Juneau, can be reached by auto. This glacier perhaps is the greatest attraction to tourists inasmuch as they are able to get a much better idea of the formation of a glacier in general [Color photomechanical postcard]
- .1.84 – Juneau, Alaska [on verso:] Juneau, the capital of Alaska, is situated on Gastineau Channel about 1,033 miles northwest of Seattle. The settlement and development of Juneau depend largely on mining, it being situated in what is known as the “Juneau Gold Belt.” [Color photomechanical postcard. Waterfront, with Juneau-Douglas Bridge and Douglas Island at left]
- .1.85 – Night view, Juneau, Alaska [on verso:] Juneau at night. Moonlight on the waters of Gastineau Channel presents a scene of unsurpassed beauty. Electrical illumination of the city and surroundings are modern in every respect. Photographer: Winter & Pond [Color photomechanical postcard. Juneau in foreground, Douglas Island at right]
- .1.86 – Log cabin Pres. Church, Juneau, Alaska [Photographic postcard. Exterior of Presbyterian Church]
- .1.87a – Russian Church, Sitka, Alaska [on verso:] St. Michael’s Cathedral. This remarkable edifice built in 1817 in the form of a cross is the most historic shrine of religion on the Pacific Coast. The cathedral is equipped according to the lavish customs of Imperial Russia, with gold and silver trimmings, jeweled crowns, robes of costly textures, and paintings of rare beauty and inestimable value [Color photomechanical postcard. St. Michael the Archangel Cathedral]
- .1.87b – Alaska Juneau Mine and Juneau, Alaska [on verso:] Alaska-Juneau Mine. Juneau is situated in what is known as the “Juneau Gold Belt.” Placer gold was first discovered in the Juneau district in the early ‘80’s in Gold Creek. Later prospectors discovered gold quartz deposit in the hills back of Juneau. The development of these prospects resulted in operations of a number of mining properties, the principle one of which is the Alaska-Juneau Gold Mine [Color photomechanical postcard. Juneau in left foreground, Mount Juneau in center background, mine at right]
- .1.88 – Taku maid [Photographic postcard. Nude woman standing on ice floe, Taku Glacier in background. Winter & Pond, photographers]
- .1.89 – City Hall, Juneau, Alaska. J.B. Caro & Co., Inc.
- .1.90 – Treadwell Mines, Alaska, showing Juneau in distance [on verso:] The Treadwell Mines were the first to demonstrate the possibility of the treatment of low-grade ore in Alaska. The small plant constructed soon after the discovery of the mine has been increased to a capacity of 880 stamps. Concentrates are treated by the cyanide process. Photographer W.P. Co. [Color photomechanical postcard. Mine in foreground, Gastineau Channel in center, Juneau in far distance at left]
- .1.91 – State House, Juneau [on verso:] Alaska’s capital, Juneau, Alaska. Built by the U.S. government, this building is also called the federal building. The Governor’s Office, Legislature chambers, federal court, post office, telegraph office, federal agencies, and the Alaskan Museum are located here. Howard C. Robinson, photographer [Color photomechanical postcard]
- .1.92 – Juneau and Douglas, Alaska, showing new bridge [on verso:] Juneau-Douglas Bridge. For many years, communication between these two pioneer Alaska cities was entirely by ferry. Recently there has been a modern bridge built across the channel greatly simplifying travel

between these cities [Color photomechanical postcard. Bridge at left, Douglas Island in foreground, Juneau in distance. After 1935]

.1.93 – Alaska capitol building, Juneau, Alaska [on verso:] Federal and territorial building, constructed in 1930 at cost of approximately \$750,000 houses all federal and territorial offices, post office, cable office, and territorial museum [Color photomechanical postcard]

.1.94 – Ketchikan, Alaska. Thwaites [Photographic postcard. waterfront view from Tongass Narrows]

.1.95 – The totem poles, Alert Bay, Vancouver Island, B.C. [on verso:] Alert Bay seems to be the most southerly boundary of the country that uses totem poles. The Ninikish Indians of Alert Bay are different in language and customs from all the tribes of the north. The totem poles, however, have characteristics somewhat similar [Color photomechanical postcard]

.1.96 – Ku-Seaa, Thlinget woman, Sitka, Alaska. W.H. Case [Photographic postcard. Portrait of Tlingit woman]

.1.97 – Native women weaving baskets, Alaska. Winter & Pond Co. [Color photomechanical postcard. Three Tlingit women weaving grass baskets. A child in a cradle board is on the right. A nursing bottle is on the ground in front of the cradle board. Circa 1897]

.1.98 – Haines and Fort W.H. Seward, Alaska [on verso:] Construction of Fort W.H. Seward, a U.S. military post, was commenced in 1903. Two companies of infantry are now stationed here. Haines was established soon after the discovery of placer gold in the Porcupine District fifty miles northwest of this point. It has since been the base of supplies for this district, with the hope of someday becoming a railway terminal for one of the most logical routes to the interior of Alaska. W.P. Co. [Color photomechanical postcard. Fort in the left foreground, with Army dock extending into Chilkoot Inlet]

.1.99 – Indian village, Alaska [Color photomechanical postcard. Waterfront view of Haida village of Klinkwan, with totem poles in front of houses and church in left background]
