

Alaska Railroad Photograph Collection

B1979.002

Historical Background

- 1903** Alaska Central Railway built the first railroad in Alaska starting in Seward and extending 50 miles north.
- 1910** Alaska Central Railway went bankrupt in 1907 and reorganized as the Alaska Northern Railway Co. in 1910 extending the railroad to Kern Creek- 71 miles from Seward.
- 1914** March 12- The U.S. Congress agrees to fund construction and operation of a railroad from Seward to Fairbanks.
- 1915** June- Anchorage is created as a railroad construction town along Ship Creek where the railroad moves its headquarters from Seward.
- 1916** December 1- Anchorage Alaska Railroad hospital first occupied by medical staff and patients, on 3rd Ave.
- 1917** Railroad construction crews peak at 4,500 workers. The Tanana Valley Railroad, a 45-mile narrow-gauge line into Fairbanks from the Chatanika mining area to the northwest, was purchased, principally to obtain its Fairbanks terminal Facilities.
- 1923** June 15- President Warren G. Harding marks the completion of the Alaska Railroad by driving the golden spike in ceremonies at Nenana.
- 1938** Under the management of Col. Otto F. Ohlson, the Alaska Railroad operates its first profitable year.
- 1940** Two tunnels are built through the Chugach Mountains to allow rail access to Whittier, a military port and fuel depot necessary to support the war effort. A new Anchorage passenger depot is completed in December.
- 1944** Whittier opens as a second railroad port. Diesel locomotives begin to replace steam engines, a process completed in 1966 when the last steam engine was sold.
- 1944** August- Alaska Railroad hospital at Anchorage closed down.
- Post-War** Congress approves \$100 million rehabilitation program.
- 1947** October 18- Inaugural run of the Aurora streamliner.
- 1951** November 6- Last rail placed on re-location project that eliminates the "Loop."
- 1955** March 1- Alaska Railroad awarded a 20-year contract to B and R Tug and Barge Company for operating of riverboat service on the Tanana and Yukon rivers.
- 1957** April 9- Curry hotel destroyed by fire.
- 1961** April- New \$8,500,000 Port of Anchorage completed.
- 1962** May- First car-barge service established at Whittier, followed by train-ship service in June 1964.
- 1963** April 25- President John F. Kennedy signs executive order making the Alaska Railroad tariff rates subject to the Interstate Commerce Commission.

- 1963** August 10- The Hydro-Train barge, the “Clair Engle” arrives at Whittier, beginning the first rail car service between the Continental United States and Alaska.
- 1964** March 27- Good Friday Earthquake; railroad damage is estimated at \$30 million. Freight service from Anchorage to Fairbanks is restored April 6, passenger service is back on line April 11, and freight service to Whittier resumes April 20.
- 1967** April- Control of the Alaska Railroad passes from the Secretary of the Interior to the Secretary of Transportation.
- 1983** January 14- President Ronald Reagan signs into law legislation authorizing transfer of the Alaska Railroad to the State of Alaska.
- 1983** July 15- Secretary of Transportation Elizabeth Dole and Governor Bill Sheffield sign a report detailing the Alaska Railroad’s property, assets and liabilities to be transferred to the state.
- 1983** September 23- The U.S. Railway Association sets the fair market value of the Alaska Railroad at \$22.3 million.
- 1984** May- *Tour Alaska* attaches the first three private dome railcars to the Anchorage/Fairbanks daily train service.
- 1984** July 5- Governor Bill Sheffield signs legislation establishing the quasi-public Alaska Railroad Corporation and its seven-member board of directors.
- 1985** January 5- The Alaska Railroad becomes the property of the State of Alaska in transfer ceremonies held in Nenana and Seward.

Scope and Content

The collection consists of photographic images created by the Alaska Railroad. The majority of the collection focuses on locomotives, bridges, buildings, construction, freight, equipment, passenger services, employees, and track. While the main focus of the collection is the railroad, the photographs often capture details of mid 20th century life in Alaska, as well as images of the Alaskan landscape.

The collection is arranged by subject, alphabetically. The subjects often overlap (i.e. “Derailments” and “Wrecks” share similar material), and therefore the subject index is a useful tool. Locations along the railroad line have a corresponding milepost number with Seward at MP 0 and Fairbanks at 470.3, and list of the mileposts is provided. The Alaska Railroad collection is housed in two filing cabinets. There is an accompanying collection of the Alaska Engineering Commission (which became the Alaska Railroad in 1923). It has the same accession number of B79.2, and houses nearly 2700 photographs relating to the earlier years of the railroad (1915-1923).

Helpful Terms and Abbreviations

AEC	Alaskan Engineering Commission, created to build the railroad, in August of 1923, the Commission was abolished and substituted with the “Alaska Railroad”
B & B	Bridge and Building
MOW	Maintenance of Way
MP	Milepost
MP & E	Motive Power and Equipment
Piggybacking	When the trailer chassis is separated from the tractor and loaded directly onto a railroad flatcar.

Processing Note

The finding aid and subject index was created by Diann Benti in August 2004.
