

# BLINK AT HOME

## Art Dice

### Can I create an art project from a prompt?

#### Skills to Develop

- + Shape identification
- + Color identification
- + Fine motor skills

#### Materials

- + Printable art dice [PDF]
- + Glue
- + Scissors
- + Paper
- + Markers/crayons/colored pencils

### WHAT TO DO

#### Prepare Before the Activity

1. Print copies of printable art dice [PDF]. Cut and assemble with glue if using the pre-made design.
2. To design your own: Print three copies of the blank dice from the printable art dice [PDF]. Have your child brainstorm shapes, colors, and patterns for each die. Help them design and label each die face. Cut and assemble the die with glue.

#### During the Learning Activity

1. Explain that each die has an art challenge for you to complete. One die shows colors to use, one die has patterns, and one die has shapes.
2. Have children roll the dice and identify the shapes, patterns, and colors.
3. Challenge children to create a work of art using that color, pattern, and shape. While they get started, roll the dice to come up with a challenge of your own.
4. Continue rolling and drawing to see what fun or silly pictures you and your child make.
5. Consider creating custom dice. Include animals, plants, or anything your child likes to draw.

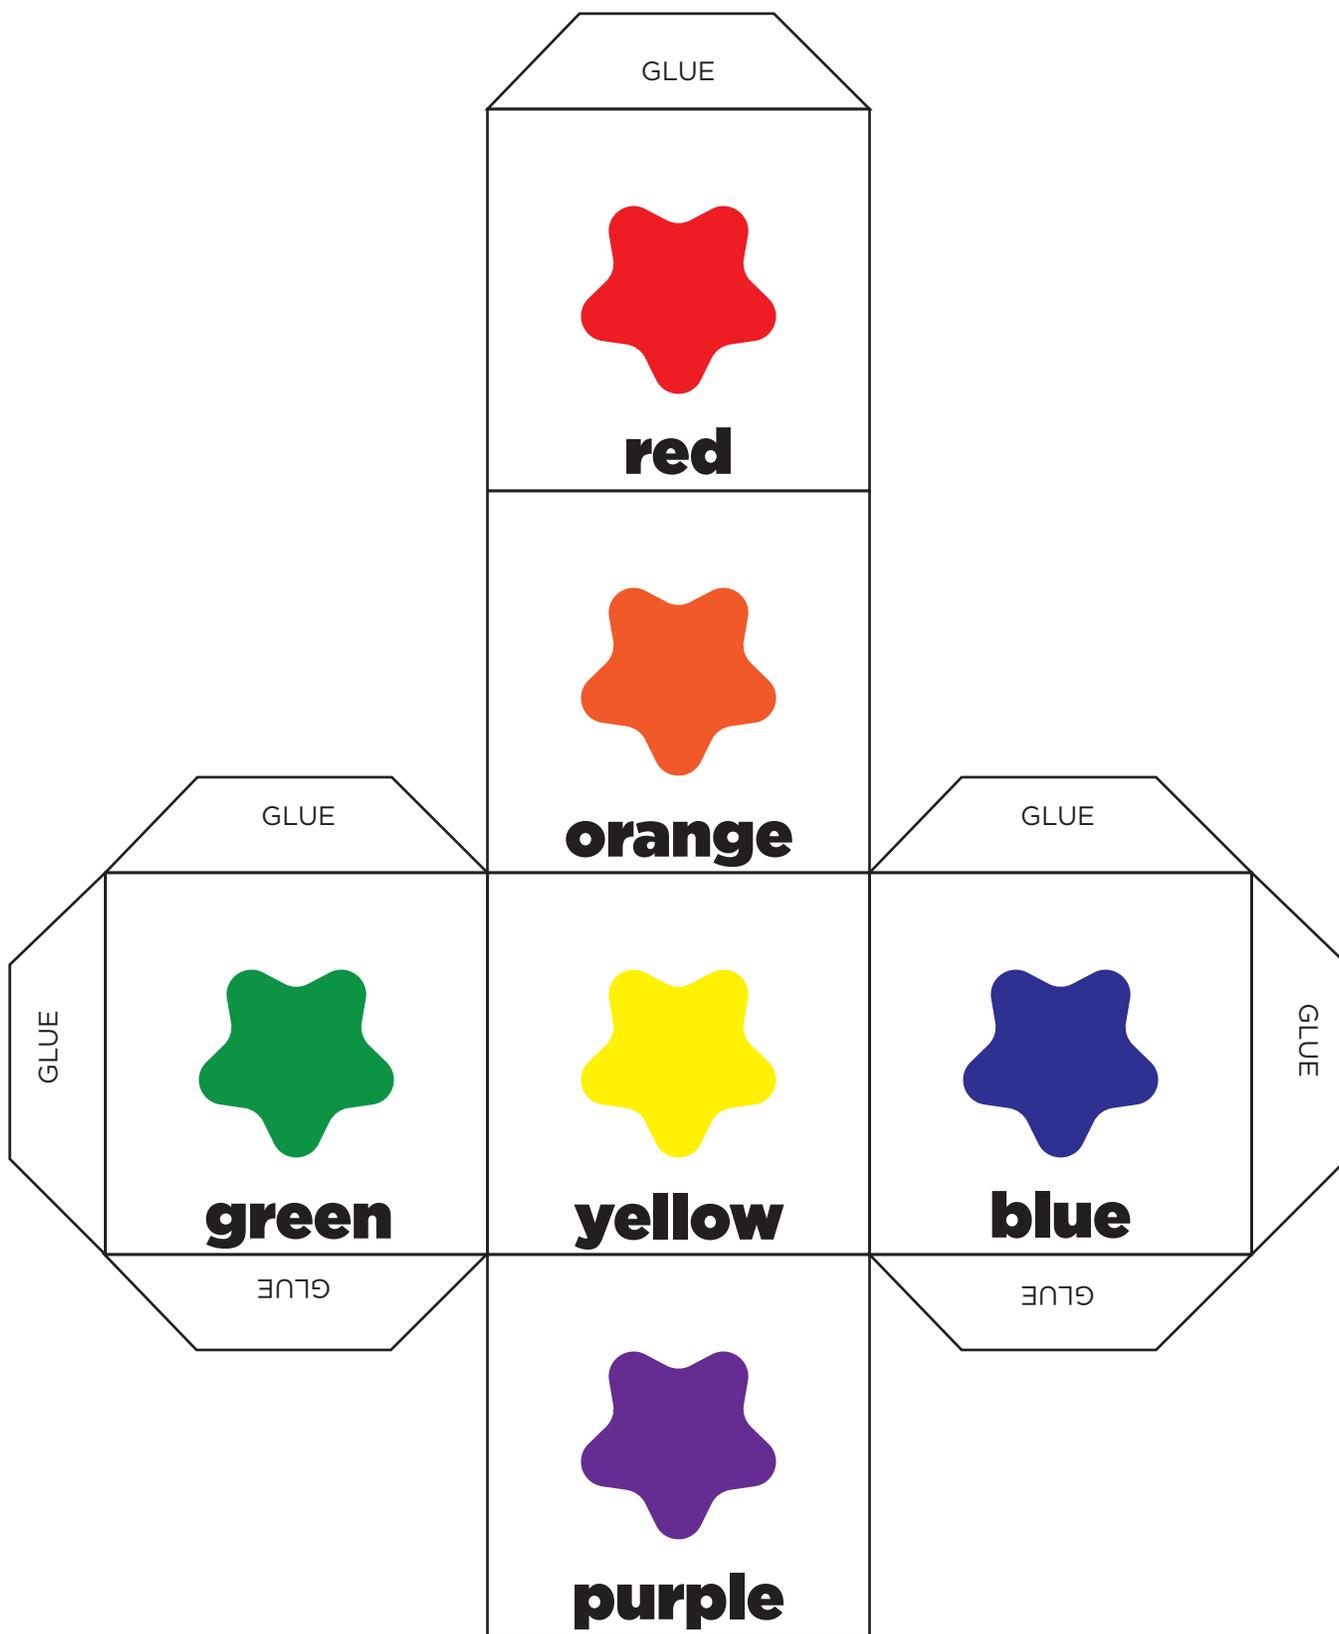

---

#### Extend the Fun

- + Have your child lie on the sidewalk and outline them with sidewalk chalk. Then roll the dice to choose patterns, colors, and shapes for filling in the outline.
