

cozy shelter

The Cozy Shelter is an inflatable hiding place with the defensive look of a sandbag fortress from the outside. The inside appears like a pastel collard cave, people can enjoy the cozy, safe, and soft atmosphere woolen blankets. Safety is a feeling, a tiny thing can take it away and make us vulnerable. A tiny hole can make this shelter collapse.

The structure consists of a 200-meter long inflatable tube, connected in layers on each other.

reversor

Not all actions are reversible, but the Reversor may attempt one. Use this machine if you are unsure whether to cut down a tree. By pulling a handle you return the felled tree to its original position above its roots. The former situation has been restored, if only for a moment.
