INTO THE ICE
– The quest for knowledge at the North Pole

Dr. Jan-Gunnar Winther, director Norwegian Polar Institute
A CHANGING ARCTIC
N-ICE2015 gave us a golden opportunity to do science in an area, and at a time of year, that has seldom been studied before. N-ICE2015 intends to produce a new and comprehensive dataset on the new sea ice regime in the north, not at least valuable for improving climate models.
Throughout the cruise we studied oceanographic properties, the marine ecosystem, the ice itself, radiation, meteorological parameters, ice dynamics and ice mechanics.
SEA ICE
UNDER-ICE DIVING
THE LOCALS ARE CURIOUS
OUR COMMON FUTURE
