

Can we count the sled dogs?

Skills to Develop

- + Counting
- + Number identification
- + Mathematical thinking

Materials

+ Sled dog photos [PDF]

Count

- + Sticky notes
- + Pencil/crayon/marker

WHAT TO DO

During the Learning Activity

- 1. Look closely at the sled dog photos [PDF] one at a time. For each photo ask: what do you see? What else can you see? What do you think is happening in this photo?
- 2. Read the caption to your child to learn more about the photo.
- **3.** Invite your child to count the number of dogs in the photo. Support your child's counting as needed by pointing and counting each dog in the picture or counting out loud along with them.
- **4.** Invite your child to write the number of dogs they counted on a sticky note and attach it to the photo. Support your child as needed by writing the number lightly in pencil and having them trace the number in crayon or marker or asking them to write the number on their own.
- 5. Repeat this process with the other photos.
- **6.** Discuss the photos as a whole to compare and contrast. Ask: *which photo has the most dogs? Which photo has the least dogs? Which photo is your favorite? Do any photos have the same number of dogs? Can you put the photos in order from fewest dogs to the most dogs?*

Extend the Fun

+ Count other objects in the photos, such as people, dog paws, or buildings.

Sled dog photos: Print and use

Sled dog sleeping in Jerry Austin's dog sled during the Iditarod Trail Sled Dog Race Joe Redington Sr. Family Collection, Anchorage Museum, B2006.023
