Guide prepared by: Sara Piasecki, Photo Archivist

TITLE: Sanborn Recording of 1964 Earthquake

COLLECTION NUMBER: B1997.023

OVERVIEW OF THE COLLECTION

Dates: March 27, 1964

Extent: 1 item

Language and Scripts: The collection is in English.

Name of creator(s): Eugene Hallam

Administrative/Biographical History:
Eugene Hallam was working as an inertial platform technician for Litton Industries, a guidance and control systems company, in Woodland Hills, California in 1964. He was assisting testers on March 27, 1964 when the machine began to record unusual activity. The testers suspected a “power bump,” but Hallam convinced them to keep the equipment running, thus recording earth movements from the Good Friday Earthquake.

From Hallam’s letter accompanying the chart:
“This Sanborn recorder paper was made from an LN12 inertial navigator… This unit was running in nav open loop, such as an aircraft in flight, only on a test stand. The test stand is mounted to a cement column about 12’ into the earth. The recording is from accelerometers which sense movement, y accel. N-S, z accel E-W. An accel. pickoff moves, voltage change is noted by computer, which responds with a voltage to correct to the torquers. This voltage is also recorded on Sanborn chart… This is all done with or in line with stable platform with gyroscopes controlling the platform.”

Scope and Content Description:
The collection consists of one Sanborn recording of the 1964 Alaska Earthquake, taken at Woodland Hills, California.
Arrangement: Not applicable

CONDITIONS GOVERNING ACCESS AND USE

Restrictions on Access: The collection is open for research use.

Physical Access: Original item in good condition.

Technical Access: No special equipment is needed to access the materials.

Conditions Governing Reproduction and Use:
The Anchorage Museum is the owner of the materials and makes available reproductions for research, publication, and other uses. Written permission must be obtained from the Anchorage Museum before any reproduction use. The Anchorage Museum does not necessarily hold copyright to all of the materials in the collections. In some cases, permission for use may require seeking additional authorization from the copyright owners.

Preferred Citation:
