TITLE: Dora Keen Collection

COLLECTION NUMBER: B2015.008

OVERVIEW OF THE COLLECTION

Dates: 1880-1958 (bulk 1911-1932)

Extent: 7 boxes, 5.4 linear feet

Language and Scripts: The collection is in English.

Name of creator(s): Dora Keen, George W. Handy, H.L. Tucker, Alfred H. Brooks, Thomas Riggs Jr., Ralph S. Tarr, D. W. Eaton, Rob. Sewell, Lawrence Martin, Merl LaVoy, E. F. Foley, T. H. Lindsey, Leonora Brooks Borden Trafford

Administrative/Biographical History:

Dora Keen was born June 24, 1871, in Philadelphia, a daughter of the surgeon William Williams Keen. She was educated at Bryn Mawr College, graduating in 1896. Her interest in mountaineering began during a trip to the Alps in 1909-1910. She traveled to Alaska in 1911 “merely to see the wonderful scenery of the southwest coast,”¹ but shortly after arriving developed her plan to summit Mount Blackburn. Her first attempt failed; she returned and successfully reached the top on May 19, 1912. Keen’s 1911 expedition to Mt. Blackburn was the first expedition to use dogs on a mountain, the first to succeed without Swiss guides, the first to camp in snow caves, and the first to make a prolonged night ascent.²

Subsequent to summiting Mt. Blackburn, she traveled across the interior to the Yukon River, becoming the first woman to cross the Skolai Pass. In 1914, she was part of a scientific expedition to Harriman Fjord and College Fjord, in Prince William Sound, and made the first explorations of the Harvard Glacier. Keen wrote numerous articles for journals and popular magazines and lectured on her experiences. She became a fellow of the Royal Geographical Society, London, in 1914.

Keen married German-born George William Handy on July 8, 1916, in McCarthy. They settled in West Hartford, Vermont, and operated a farm. The couple divorced after 16 years of marriage. Dora later served as librarian at the West Hartford Library and sold insurance. She died while traveling, in Hong Kong on January 31, 1963.³

Scope and Content Description:

The collection consists of 1350 photographic prints (including one cyanotype, proof prints, panoramas, enlargements, and micrographs), 54 nitrate negatives, news clippings and other ephemera created or collected by Dora Keen, circa 1895-1940. Included are photographs taken by Dora, as well as those taken by other members of her Alaska expeditions, other explorers and geologists working in Alaska, and professional photographers in America and overseas. The collection includes Dora's scattered notes on camera types and exposure times, as well as several images showing Dora holding her cameras.

There are approximately 750 images of Alaska, primarily of the two attempts at Mount Blackburn, 1911-12; the return via the Nizina-White River Route, 1912; the expedition to College Fjord, Harriman Fjord, and Columbia Glacier, September 1914; the Keen-Handy wedding, 1916 (.726-734); the Kanatak area, 1923-1925, including two images of Frederick Martin's Douglas World Cruise biplane after its crash landing in 1924; and a trip to Port Wells and Harriman Fjord, 1925. Photos collected by Dora include some early Alaska-Canada Boundary Survey images.

The remaining photographs are of non-Alaskan locations. The vast majority of these are of the Beulah Farm in West Hartford, Vermont, which Dora and George ran circa 1917-1932. There are also images from Road's End Farm in East Dover, Vermont, 1934-1935. There are approximately 200 photographs from Dora's travels in the United States and abroad, most dating from 1890-1910.

Arrangement: The collection was received in other than original order. Arranged by format into four series: 1. Albums. 2. Loose prints. 3. Negatives. 4. Ephemera. Loose prints and negatives are arranged by Keen's own numeric system when indicated. Photos without Keen's numbering are arranged by location and year, when known.

ADMINISTRATIVE INFORMATION

Acquisition and Appraisal Information

Purchased from Skinner Auctions in 2014. Skinner indicated that the unnamed seller had found the collection with material from his father's photo studio; his father had received them from an unnamed individual in the 1970s.

Processing Notes

The collection was received in other than original order. Previous owners disbound albums and cut photos out of several pages. Attempts were made to reorder the pages by date as much as possible. Many loose prints show evidence of having been removed from albums prior to accessioning; single photos cut out of albums housed with loose prints.

Original photo and negative sleeves bearing manuscript notes are housed with collection ephemera.

Negatives scanned at time of processing.

Separated Materials

Nitrate negatives removed to freezer. Oversize materials removed to oversize shelving.

Note

Images published by Keen prior to 1923 are in the public domain. When known, publication dates are included with individual item descriptions.

 .1193 – Tel-el-Amarnah, capitol of reformer Amenhotep IV, 18th dyn. Below Thebes. Painted stucco pavements, revolution in realistic art [detail of relief at Amarna]
 [Prints .1194-1205 in original envelope labeled "Miss Keen, Continental Hotel"]
 .1194 – Agra, Pearl Mosque, in Palace of Shah Jehan (2nd Grt. Moghul), in the fort. It is of white marble cut in bas relief. A perfectly satisfactory beauty [exterior of Moti Masjid]
 .1195 – Agra, Taj Mahal. Solid white marble. Decoration of flowers cut bas relief in the panels, or else inlaid in semi-precious stones. Many stones are red, blue, or orange, but all the colors are soft and harmonize. It is said of the Moguls that they "conceived like Titans and finished like jewelers." [bird's eye view of reflecting pools and southern exterior of Taj Mahal]
 .1196 – Agra, Tomb of I'timād-ud-Daulah, high treasurer of Emperor Jehangir, 1670, 3d of the Great Moguls, or Mohammedan conquerors. The tomb is a gem. White marble inlaid with semi-precious stones, chiefly dark. The screens are each carved out of one piece of marble [exterior]

.1197 – Agra, Taj Mahal. Interior showing tomb and screen surrounding. Mausoleum of “Begum”, or wife, of Shah Jehan. Built by him. On river, & can be seen from Jasmine Tower where he died. His tomb next hers, not showing. Tombs both of white marble, inlaid. Screens of white marble, inlaid around the borders. Every bit perfect.

.1198 – Agra, Jasmine Tower of Shah Jehan’s palace in the fort, overlooking the Jumna River. He was the 2d Grt. Mogul, 1648 A.D., who built the Taj. This tower is part of the zenana, or women’s apartments. It is 2d only to the Taj in beauty in all India. White marble inlaid everywhere that is not cut into screen work. Dome tarnished gilt. Floors marble inlaid, with fountain. [exterior]

.1199 – Benares. “Ghats” (= gawts). A ghat is a flight of steps into the river used for bathing or washing, or worshipping. This is the R. Ganges, so sacred that it is an object of pilgrimage from all India. Nearly every rajah has a palace on it. Here a Hindu wishes to die & have his corpse burned. We saw all these things going on. The peaked buildings are temples. Palaces at top [view across river to opposite bank]

.1200 – An “ekka”, the usual native conveyance “up country” in India. Law limits the capacity to six, which seems to be the usual number. Space really for only one. I had to ride to an out of the way palace at Jeypore in one yesterday. At Kapurthalla our 3 trunks and 4 bags went 7 m. in one for 50 cts. [three men riding in horse-drawn cart]

.1201 – H.H. the Maharajah of Gwalior, one of the largest native states. Note the Gwalior turban, caste mark on forehead, and jewels. He is one of 8 invited to the coronation, & one of 4 going, in spite of high caste. Gwalior is 71 m. s.e. from Agra, one of the rock fortresses [studio portrait of Mâdhav Râo Sindhia]

.1202 – A “bearer” carrying his mistress’s pith hat, because it is after 4 P.M. when the sun’s danger is over. Shoes because outdoors. No socks. As stupid as all the rest. We are on our 4th, the best yet. The “bearer” packs up and when one is visiting often includes the hostess’s bed linen, blankets, and towels, only to transfer them later to his own luggage! Hence hostesses now don’t provide these for guests [portrait of man in traditional clothing posed in front of backdrop]

.1203 – A “dhursie,” or tailor. Probably a Bengalee from the dress. Barefoot, of course. Wages 16 to 32 cts. a day. Very unusual to see the treadle. Singer machines invade the East everywhere, but in India the usual sight is the hand attachment, the native and his machine both on the floor. [portrait of man sitting at sewing machine in street]

.1204 – Native woman such as an “ayah.” She wears a full skirt of cotton and a jacket half way to waist. Only this cloth beside. Trousers under shirt. If Mohammedan, no skirt over trousers. The water jar she carries is usually on the head. Women do the hardest work and carry the biggest burdens. This one unusually pretty [portrait of woman in traditional clothing posed in front of backdrop]

.1205 – Women grinding meal between two heavy stones by a peg on which their hands are in picture. Notice gold bracelets. Anklets, toe rings, and necklaces happen not to show. Jeypore [two women in traditional clothing seated on rug]

.1206 – A huge creeper on the jungle road from [Taungoo?] to the Shan Hills, Burmah [view down road, cart carrying passengers with parasols stopped in distance]
