**TITLE:** Copper River & Northwestern Railway Album

**COLLECTION NUMBER:** B2012.028

**OVERVIEW OF THE COLLECTION**

Dates: 1909-1911

Extent: 305 items, 1.3 linear feet. Some of the same images occur two or three times and duplicates are noted in the detailed description below.

Language and Scripts: The collection is in English.

Name of creator(s): Unknown, E. A. Hegg, M. A. Jacobson, \_\_\_\_\_ Manning

**Administrative/Biographical History:**

The Copper River & Northwestern Railway was built between 1906 and 1911 and connected Cordova with the Kennecott Copper Mines near McCarthy, 196 miles to the northeast. The railroad was built primarily to haul high-grade copper ore down to the port of Cordova, where it was shipped to a smelter in Tacoma. In operation from 1911 to 1938 when the mines closed, the railroad followed the Copper River north to Chitina and then east to Kennecott, and included at least six tunnels and a temporary trestle across the Copper River near Chitina that was allowed to wash out each year—it was cheaper to rebuild it than to put in a permanent structure. The most famous feature of the railroad was the “Million-dollar Bridge,” a steel bridge across the Copper River with glaciers discharging into the river on either side.<sup>1</sup>

This collection is a mixture of commercial photography and images taken by an unknown photographer, perhaps the man in image .304 (and featured throughout the collection) who wrote on its reverse: "Did I send you one of these before? They are not good," and signed it "A.A.D." On the reverse of image .303 he wrote: "Guess I have sent you some cards like this before but have no others at present as everything is torn up yet so have been unable to make any more," implying that he was taking and developing the photographs.

#### Scope and Content Description:

The collection consists of a photo album containing 308 black & white photographs. Only a few photos have captions printed on them. Five photos had been separated from the album and have messages penciled or inked on the reverse, signed by "A.A.D." Some of the mounted photos have loose corners and messages partially visible on the reverse, apparently sent by "A.A.D." while he worked on the railroad in 1909-10. There is little order to the mounting of photos in the album and there are some images of non-Alaskan subjects, such as scenes identified as being in Wallace, Idaho, and a few non-Alaskan railroad images.

Highlights of the collection include Copper River Natives wearing beadwork and regalia, railroad construction activities such as grading roadbeds, steam shovels operating, snow removal, and bridge and trestle construction, as well as images of railroad rolling stock and the paddlewheel steamboat *Nizina*.

Arrangement: Not applicable

#### **CONDITIONS GOVERNING ACCESS AND USE**

Restrictions on Access: The collection is open for research use.

Physical Access: Original in items in good condition except for some partially torn images.

Technical Access: No special equipment is needed to access the materials.

#### Conditions Governing Reproduction and Use:

The Anchorage Museum is the owner of the materials and makes available reproductions for research, publication, and other uses. Written permission must be obtained from the Anchorage Museum before any reproduction use. The Anchorage Museum does not necessarily hold copyright to all of the materials in the collections. In some cases, permission for use may require seeking additional authorization from the copyright owners.
