TITLE: Alaska Railroad Collection

COLLECTION NUMBER: B1979.002

OVERVIEW OF THE COLLECTION

Dates: 1915-2014

Extent: 148 boxes; 76.5 linear feet

Language and Scripts: The collection is in English.

Name of creator(s): Phinney S. Hunt, Henry G. Kaiser, Sydney Laurence, Albert J. Johnson, Alaska Railroad

Administrative/Biographical History:

The Alaska Railroad is a freight and passenger railroad owned by the State of Alaska that runs from Fairbanks to Seward. The Railroad got its start in 1903, when the Alaska Central Railroad was built in Seward, Alaska. The railway extended 50 miles north before the company went bankrupt in 1907. In 1909, the Alaska Northern Railway purchased and extended the line 20 miles to Kern Creek.

The Alaska Engineering Commission (A.E.C.) was created in May 1914 by President Woodrow Wilson to implement the surveying of routes through the territory of Alaska. The A.E.C. purchased the Alaska Northern Railway, which in 1915 moved its headquarters along Dgheyay Kaq' (The Mouth of Ship Creek) near the townsite of Anchorage. By 1917 the A.E.C. incorporated the Tanana Valley Railroad which had constructed 45 miles of southward line from Fairbanks. In 1923, the northern and southern railroads would converge in Nenana, completing the Alaska Railroad. This momentous event was commemorated with the driving of the golden spike by President Warren G. Harding.

Over time traffic on the Alaska Railroad gradually increased, and by 1938 the railroad was able to report its first profitable year. During World War II, the line would grow further in order to support the war effort. In 1944, two railroad tunnels were constructed through the Chugach Mountains to allow rail access to the military port in Whittier. This would eventually grow to become the Alaska Railroad's second major port.

Following the war, the Alaska Railroad began to contract barges and riverboat services along the Tanana and Yukon Rivers. In 1963, the Clair Engle, a Hydro-Train barge, became the first rail car service from the Continental United States to Alaska. The railroad's operations were temporarily disrupted by the 1964 Earthquake, which caused a great deal of damage to the Railroad, costing an estimated \$30 million and taking months to bring the line back up to full service. In 1967, the Railroad would pass from the Secretary of the Interior to the Secretary of Transportation. After over 70 years of ownership by the federal government, in 1985 the Alaska Railroad was sold in full to the State of Alaska for \$22.3 million. Today, the Alaska Railroad operates freight and passenger trains in the State of Alaska.

Scope and Content Description:

The collection consists of over 10,000 photographic images created by and related to the Alaska Railroad. The majority of the collection focuses on locomotives, bridges, buildings, construction, freight, equipment, passenger services, employees, and track. While the main focus of the collection is the railroad, the photographs often capture events and details of mid-20th century life in Alaska, such as the 1964 Earthquake, floods, celebrations, and many scenic images of the Alaskan landscape. The collection depicts a wide variety of locations along the Alaska Railroad including Seward, Whittier, Portage, Anchorage, Eklutna, Palmer, Houston, Suntrana, Healy, Nenana, and Fairbanks.

Arrangement: The collection is arranged by Series and Addenda.

CONDITIONS GOVERNING ACCESS AND USE

Restrictions on Access: The collection is open for research use.

Physical Access: Original items in good condition.

Technical Access: No special equipment is needed to access the materials.

Conditions Governing Reproduction and Use:

The Anchorage Museum is the owner of the materials and makes available reproductions for research, publication, and other uses. Written permission must be obtained from the Anchorage Museum before any reproduction use. The Anchorage Museum does not necessarily hold copyright to all of the materials in the collections. In some cases, permission for use may require seeking additional authorization from the copyright owners.

ADMINISTRATIVE INFORMATION

Acquisition and Appraisal Information

Materials were originally deposited in the Archives by the Alaska Railroad in 1979 as a long-term loan, and official ownership was transferred to the Anchorage Museum in 2010. Addenda were deposited in 2004, 2012, and 2014.

Processing Note

The first finding aid and subject index were created by Diann Benti in August 2004. A full inventory was conducted by Intern Eli Williamson and Archives Technician Mikayla McCallum to create an updated finding aid in 2025.

Helpful Terms and Abbreviations

AEC	Alaskan Engineering Commission, created to build the railroad, in August of 1923, the Commission was abolished and substituted with the "Alaska Railroad"
B & B	Bridge and Building
MOW	Maintenance of Way
MP	Milepost
MP & E	Motive Power and Equipment
Piggybacking	When the trailer chassis is separated from the tractor and loaded directly onto a railroad flatcar.

The Alaska Railroad Collection was previously comprised of a variety of collections in order to complete the Alaska Engineering Commission prints (Series 1). From 2025 onwards, photographic prints from other collections found in Series 1 will be pulled and returned to their originating accession group.

Collection contains outdated sentiments and language. Restricted items have been masked for sensitive and/or restricted content.

Detailed Description of the Collection

Series 1 – Alaska Engineering Commission (A.E.C.) Prints

The A.E.C. series consists of over 3,000 images in folders. Photographs are organized by series, which are labeled by letters, such as G and H, and small series, such as an AN, B, L, T, and JT. Duplicates exist for a majority of the collection.

Editor Alaska Railroad Record: A large American flag was raised at Falls Creek during the noon hour today. The ceremony was attended by all the employees of the camp. Mr. Ryan, of the culinary department, gave an address worthy of the cause, explaining to the foreigners, of whom there were a great many present, the meaning of the Stars and Stripes and the grand country it represents. He also sang the patriotic song, "The Grand Old Flag," which was received with great applause. The stationmen contributed their share by firing the customary salute to the flag. EMPLOYEE." A.E.C. G1131 H.G.K. Anchorage harbor from Gov't Hill. Feb. 20-1919. [typewriting added to top of image: "This view was taken looking down Knik Arm towards Cooks Inlet. Here the tide goes in and out twice daily, winter and summer. In the winter of course the water freezes but the ice is broken up continually by the tide, resulting in the forming of ice cakes. By late winter some of these cakes reach the size of large rooms and are deposited on the shore by outgoing tides, as may be seen on some of the pictures in this album. In March and Sept. the tides are over 35 ft. high, 2d highest in the world. In severe cold weather, 20 to 40 degrees below zero, the water is much warmer than the air, and steams. The floating ice going in and out continuously precludes navigation from about the middle of Nov. to the middle of April, when commodities must be brought in over the Railroad, excepting of course those that are brought in by air, not an inconsiderable lot. Many large rivers empty into Cooks Inlet but because of the heavy tides the water is salty, and quite muddy, this mud being very deep and sticky on the shores. Ships must time their arrivals so that they come in with the tide and go out with the tide, when departing. Tables showing time of all tides are prepared for years in advance. Fire Island visible in distance at left."] [Alaska Engineering Commission (A.E.C.). Henry G. Kaiser, photographer]

In 1947 I found practically the entire area at the right, up to the shore, filled in and covered with oil storage tanks, lumber yards and similar industries. This mole and the trestle were built in 1917. In the winter ice 10 to 15 ft. thick freezes in a solid mass on the piling under the dock, making the structure extremely rigid and able to withstand the buffeting of the floating ice cakes that come and go with the tide."
